

Big Data Analytics Techniques and Applications

Homework 2

Due Date: 2022/04/06 23:59:59

- Dataset

Airline on-time performance datasets. You can find these datasets on E3.

You need to use **PySpark** to analyze the given dataset to answer the following questions.

(**PySpark Documentation:** <https://spark.apache.org/docs/latest/api/python/>)

(**PySpark Tutorial:** <https://sparkbyexamples.com/pyspark-tutorial/>)

- Questions:

- Q1: Find the maximal delays (you should consider both ArrDelay and DepDelay) for each month of 2007.
- Q2: How many flights were delayed caused by security between 2000 ~ 2005? Please show the counting for each year.
- Q3: List Top 5 airports which occur delays most and least in 2008. (Please show the IATA airport code)

- Requirements

- Submit a report named "HW2_StudentID.pdf" to E3 and describe clearly the following items:
 - You can use PySpark via **Google Colab** or other platforms.
 - Refer to "PySpark_Colab.pptx" for the usage of PySpark in Colab.
 - The execution results by using PySpark (Attach source code)
 - Descriptions of how you solve each question in detail.
 - Some figures or tables to illustrate your analyzed answers to each question.

- Anything else worth mentioning (e.g. other valuable observations, or difficulties encountered in this work and how you resolve them).

- Penalty for late submission

- If your work is submitted within one day after the deadline, a penalty of 20 percentage marks will be applied.
- If your work is submitted within two days after the deadline, a penalty of 50 percentage marks will be applied.
- If your work is submitted over two days after the deadline, you will get 0 in this homework.
